## Fire Extinguisher Training

Based on the client's requirements, this course is customized to train the Fire/Emergency Evacuation Teams in how to use a fire extinguisher and can be a separate class or enveloped into the above Fire/Emergency Evacuation Team Policy Review, Revision and Training course. Actual use of a fire extinguisher can be coordinated as part of training if safety precautions are implemented, outside space is available, fire extinguishers are recharged, and this piece of training is coordinated with the local fire department before implementation. This course content is approximately 1-2 hours in length depending on class size and can be a standalone training class.
