Active Shooter/Workplace Violence Policy Review, Revision And Training

This service is provided to organizations who may need assistance with developing or revising an Active Shooter or Workplace Violence policy and training for their employees. Upon creation or revision of either policy, a custom-tailored training session will be developed to train all employees on the organization's Active Shooter or Workplace Violence Policy. The course for Active Shooter teaches the basic DHS response of "Run, Hide, Fight" using tabletop exercises of the organization's building layout to aid in developing situational awareness should an Active Shooter Response need to be implemented. This class is 1-4 hours in length depending upon the client specific content to be covered on either topic and class size.
